SCM Product Updates

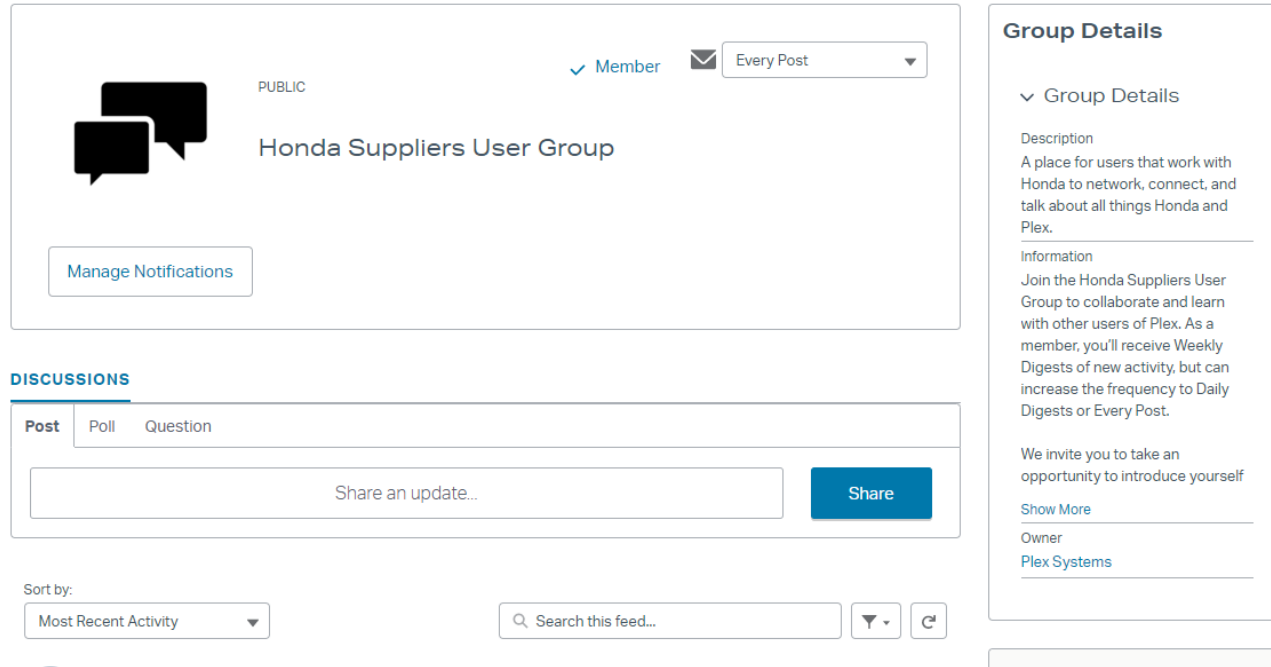

Agenda

- Honda Specific Updates (5 minutes)
- SCM Roadmap Investments (5 minutes)
- Shipping to Honda – Setup (10 minutes)
- Q/A (10 minutes)

OEM Specific Updates in the Community

The screenshot shows the interface for the 'Honda Suppliers User Group'. At the top, there's a header with a speech bubble icon, the word 'PUBLIC', a 'Member' status with a checkmark, and a notification dropdown set to 'Every Post'. Below this is a 'Manage Notifications' button. The main section is titled 'DISCUSSIONS' and has tabs for 'Post', 'Poll', and 'Question'. A text input field with the placeholder 'Share an update...' and a blue 'Share' button are present. Below the input field, there's a 'Sort by:' dropdown set to 'Most Recent Activity', a search bar with the placeholder 'Search this feed...', and a filter icon. On the right side, there's a 'Group Details' sidebar. It includes a 'Group Details' section with a description: 'A place for users that work with Honda to network, connect, and talk about all things Honda and Plex.' and an 'Information' section: 'Join the Honda Suppliers User Group to collaborate and learn with other users of Plex. As a member, you'll receive Weekly Digests of new activity, but can increase the frequency to Daily Digests or Every Post.' Below this, it says 'We invite you to take an opportunity to introduce yourself' with a 'Show More' link. At the bottom of the sidebar, it lists the 'Owner' as 'Plex Systems'.

Additional OEM User Groups

- Ford
- GM
- FCA
- Toyota
- BMW
- PACCAR
- John Deere

Honda Specific Updates

New Capabilities Specific to Honda

- New Baseline Labels
 - “Honda 2020” & “Honda 2020 x2”
 - “Honda 2020 w/ Pack” & “Honda 2020 w/ Pack x2”
- ~250 Label with Honda “in the Name”
 - Active – Should be Current
 - Retirement Evaluation / Obsolete Replaced – Still usable, but old versions.

2021 Honda Specific Ideas “under consideration”

- Support for notifying Honda of a revision change via EDI
 - Adding a new field to the Customer Part No form
 - Next Revision Number
 - Settings control the Display
 - Value in this field will added to the ASN to communicate upcoming revision change to Honda
 - Available to be mapped to labels in the Label Designer
 - Update to the Honda Label as needed (TBD)
- Dialogue/Updates in the “Community”
 - Exchange
 - Honda Supplier Users Group
