

# REVCONNECT

*Powered by Revolution Group and Boomi*

Unleash the Power of Plex on the plant floor coupled with the consistency of established back office systems.

The combination of Plex MES, RevConnect and existing back office systems enables composable systems strategies with configurable, interoperable, and flexible applications.

RevConnect integration platform enables you to quickly coordinate the integration of Plex MES, QMS, or PM, with established applications, making moving data and automating business processes painless. Efficiently build your composable systems strategy, improve IT agility and drive business growth by connecting fluently to the Plex Manufacturing Platform.
