In 2001 Revolution Group joined together with a major Tier One Honda supplier to realize the power and potential of Plex MES. Built from and for the plant floor, Plex brought dramatic transformation to the organization, and Revolution has been an evangelist in the marketplace!

Since then, we have implemented or supported MES, QM and PM in nearly every client we have touched, whether we did it as a part of the full Plex ERP bundle, stand alone, or integrated into other back-office systems – 100s of plants, every possible configuration. We believe fully in the product and bring our enthusiasm and experience to every opportunity.

Because we understand manufacturing business processes from beginning to end and every point in between, our team of business savvy consultants and developers regularly design and build integrations with back-office systems to streamline processes for Rockwell clients.

In 2019 we engaged with Drinkworks LLC, a joint venture between Anheuser Busch and Keurig, to implement Plex MES in their pod manufacturing facility to bring world class visualization and control to the plant floor that they simply couldn't get from their corporate systems. Working with their corporate teams, we designed and developed one of the first full MES integrations between Plex and SAP. Hear about the Plex MES impact at Drinkworks [here](#).

We offer you our 50+ years of manufacturing systems sales & implementation skills. We regularly sit at the table with prospects bringing a strong belief in the value of Plex, decades of real-world experience and a mature vision to help your valued clients confidently choose Plex.

Who We Are

Positive Attitude | Optimistic and drama-free

Do the Right Thing | Honor and ethics in every way

Extraordinary Relationships | Take great care of each customer and each other

Lifelong Learning | Constant personal and professional growth

Work Hard – Have Fun | Be productive and be happy
